pub 3
18 (amended). The backrest/leisure chair of claim 11, wherein an obtuse angle is formed
by the intersection of the average pitch of the lower portion and the average pitch of the
upper portion, and wherein said obtuse angle is between about 160 degrees and 170
degrees.

pub 3
20 (amended). The backrest/leisure chair of claim [20] 11 further including an unattached
legrest cushion for supporting the lower legs of the user, and having [an anti-slip] a
generally slip resistant surface on the bottom of [it's] its upholstery.

21 (amended). A backrest/leisure chair comprising:

AG
? 1
which is
(a) a generally wedge shaped support foundation having an inclined face, said face
comprising an upper portion and a lower portion, with the lower portion of the face
being oriented at an acute angle relative to a horizontal plane such as a floor or bed,
said support foundation further having a convex contour on the lower portion of said
face for supporting an occupant's lumbar region in a relatively natural lordotic curve,
said convex contour being generally uniform in cross sectional shape like [an] a
semi-elliptically shaped cylinder, said face further having a valley on the face of the
generally wedge shaped foundation generally in the area where the upper portion
and lower portion meet resulting in the upper portion of the face ^{having an average} being on ^{an average pitch of} average
oriented at a higher angle relative to the horizontal plane than the lower portion ^{on}
average, wherein said valley provides a means for cradling an occupant's thoracic
curve; and

(b) a top cushion having an upper and lower portion secured to the face of said
generally wedge shaped foundation.

Thank you.
